Cambridge, England Things got heated up during the construction of an ice rink in Cambridge as a grenade ignited the bucket of an excavator. Knowing the danger this presented to the job site, EOD technicians were called in to assist in removing other grenades on site.

The Royal Logistic Corps Bomb Disposal team arrived on scene and identified the grenades WWII era likely buried after the war. Due to the late hour, a perimeter was set up and the grenades were safely watched until the following morning when the bomb disposal team was able to safely detonate all the discovered items.
