HDR has been at the forefront of the Military Munitions Response Program providing range inventories, site inspections, remedial investigations, feasibility studies and removal actions across North America since this program began in 2001. We have continued our industry leading position with substantial investments into the innovative tools and technologies that allow us to meet regulatory requirements while providing cost-effective sustainable solutions for our clients. Our in-house geophysical resources have allowed HDR to execute aerial, terrestrial, and aquatic projects for Government and Commercial clients.

To date, our projects have received seven (7) EPA Phoenix Awards and we are consistently ranked by Engineering News-Record as one of the top environmental firms in the world. Our turnkey services include:

- Site Characterization
- Wide Area Assessment via LiDAR and orthophotography
- Digital Geophysical Mapping, including HeliMagsm and terrestrial systems
- Underwater DGM via HDR MarineMagsm
- Advanced Target Classification via HDR3D, our advanced MetalMapper system
- Removal and Remediation Services
