Over 150 more munitions related photos have been uploaded to the UXOInfo.com photo gallery. The photo collection came from a UXOInfo.com user who discovered them at the National Archives in College Park, Maryland. The photos include a series of images from the 1920's taken at Aberdeen Proving Grounds (APG), Maryland during testing of the 100lbs Demolition Bombs. Photos include drop tests, rifle impact tests as well as performance testing of the munitions. Other images include cut-aways of munitions components and ice bombing (a future UXOInfo.com article). Several of the images are shown below.

To view the others, please use the Photo Library link on the right hand menu and look in the Bombs and Classic categories. Enjoy. More images from the collection will be uploaded this month. If you have any images or documents to donate to the on-line library which is free to all users, please email them to UXOInfo.com at information@uxoinfo.com. Thank you.
