CH2M is an industry leader providing munitions response (MR) services for planning, compliance, investigation and removal or remediation services. CH2M provides the full scope of services required to support mission goals at sites suspected or known to have Munitions and Explosives of Concern (MEC).

CH2M has over 20 years of successfully completed MR and high-hazard projects. CH2M combines its reputation for high-tech innovative solutions with a knowledgeable and committed staff of program and project managers, engineers and scientists, and UXO professionals to provide the following MR services:

- Digital Geophysical Mapping (DGM) with industry leading Advanced Geophysical Classification (AGC) capabilities
- Underwater characterization and remediation services with dive-qualified UXO technicians
- Archive searches/ Preliminary Assessments/ Site Inspections
- Design, permitting, construction and operation of demilitarization systems
- Proficiency and experience with all MR-related documents to include MEC and Geophysical Classification for Munitions Response (GCMR) Quality Assurance Project Plans (QAPPs) and explosives and chemical safety submissions
- Removal actions/construction support/anomaly avoidance
- Remedial Investigations/Feasibility Studies and MEC and MC related hazard and risk assessments
- Operational Range Assessments and other range sustainment initiatives
- Munitions Constituent (MC) sampling and remediation services of all media
- Munitions and explosives manufacturing facility investigation and remediation services
- Regulatory compliance, air monitoring and chemistry services

CH2M has a long history of providing innovative solutions to:

- Federal (DoD, EPA, DOE, DOI, NASA)
- Commercial/Industrial
- Foreign Governments
