**Great Falls, Montana** A worker at the Easter Seals-Goodwill donation center came across a grenade mixed in with a box of recently donated household goods. The manager of the center called the police to report the find. The police responded and evacuated the building before calling the Air Force EOD unit from Malmstrom Air Force Base for technical support. EOD responded and identified the grenade as a hollow inert training round. EOD confiscated the round for proper disposal since it was not owned by anyone. A search of the facility did not reveal any additional munitions. It is unknown at this time who made the donation and why.
