Only five positions left for Underwater UXO management training designed for senior EOD/UXO supervisors or environmental managers to assist them in the planning and implementation for Underwater Munitions Response Programs. Underwater munitions are one of the fastest growing industries in Europe and effected Countries.

The training will consist of 8 days deployment to the Baltic Sea from 17-24 August 2019 to survey, investigate and monitor underwater sites. Students will embark from Gdansk Poland on-board the Research Vessels "Strakhov" from the Russian Academy of Scientists with an International Team of Professors and Experts from Russia Academy of Scientists, Royal Military College of Canada, Polish Academy of Scientists, United States University of Georgia and Canada's International Dialogue on Underwater Munitions (IDUM).

Those who are interest to further improve their knowledge and experience on underwater munitions responses, risk assessment and management options should attend. We encourage both students and environmental services industry personnel, to apply for this opportunity to learn more about the detection, investigation and monitoring of Underwater Chemical Munitions. Send your CV to [info@idum.org](mailto:info@idum.org).
