**Scottish Coast** 18 UXO items were found during a survey of the Moray East Offshore Windfarm project including 15 UXO in the North Sea windfarm site itself and another three found in the corridor leading to shore. A Dutch firm involved in laying the cabling for the project will reportedly assist with the UXO either through removal or offshore disposal. The development, due to begin construction in 2021, is expected to power more than 950,00 homes.
