MuniRem Environmental (MRE) is an industry leader in providing chemistry that near instantly neutralize and destroys explosives and other energetics to non-hazardous end products. Our MuniRem product degrades energetics and chemical warfare materiel (CWM), while stabilizing heavy metals as the insoluble metal sulfides. MuniRem is recognized as a safer and faster solution for removing explosive risks from different materials.

MRE's award winning innovative green solutions are delivered to its private industry and government clients by highly qualified, dedicated and driven staff of engineers, scientists and UXO professionals. MuniRem has been applied at diverse Munitions and Explosives of concern (MEC) project sites in the United States and internationally.

MuniRem has been applied to:

- Instantly neutralize bulk explosives
- Destroy mustard and other chemical warfare materiel to non-hazardous products
- Decontaminate explosives contaminated buildings, pipes, equipment and range scrap
- Remove explosive risks ahead of UXO Tech response
- Neutralize recovered underwater munitions on-site
- Remediate explosives contaminated soil and groundwater
- Clean explosives manufacturing plants and indoor training ranges
- Destroy explosives in spent activated carbon
- Destroy chlorinated organics (e.g., HCB, PCBs, TCE, PCE, etc.)
- Stabilize and precipitate metals as the insoluble metal sulfides
- Destroy chlorinated organics (e.g., HCB, PCBs, TCE, PCE, etc.)
- Remediation of metals (AL, As, Ba, Ca, Cr(IV), Hg, Pb, U, etc.) by stabilization as insoluble metal sulfides

MuniRem® - A Safer And Fast Solution For Explosives Neutralization

A patented chemical process that employs reduction chemistry to near instantly neutralize and destroy explosives and energetics to non-hazardous end products. MuniRem® also degrades chemical warfare materiel (CWM) and stabilizes metals.

Energetics Neutralized and Destroyed by MuniRem®

- TNT/RDX/HMX
- ADNTs/DNTs
- PETN
- Composition B & D
- Lead Azide
- TNR & Lead Styphnate
- NG
- NDMA
- Primer Mixture
- Propellants
- Other nitroaromatics
- Black powder
- Chemical Warfare Materiel (CWM)
- Metals (e.g., AL, As, Ba, Cd, Hg, Pb, etc.)
- Nitrocellulose
- Underwater Munitions

MuniRem® Reagent Packaged for Shipping
