

Customized UXO Support Solutions Ordnance Holdings, Inc. (OHI)

UXO Related Archival Research

Seasoned Team

Our research specialists know the archives system and how to find pertinent records and data.

Focused Approach

Our customized research efforts are designed to meet your specific project needs. Searches include: record & document reviews; maps, charts, and aerial photo searches; and personal interviews.

Close Proximity to National Archives

Our team is local to the National Archives I and II.

Experience

OHI's experience includes conducting research on bomb disposal histories, munitions sea dump sites, Formerly Used Defense Sites (FUDS), and water ranges.

We specialize in locating old maps and charts as well as pertinent documents related to your site or installation.

- 🔦 **Experience:** Seasoned research specialists
- 🔦 **Research Topics:** Ranges, munitions sites, sea disposal / dumping sites, ammunition plants, bomb disposal, and CWM sites
- 🔦 **National and Regional Archives:** Experience collecting data at the National and Regional Archives.
- 🔦 **Data Capture:** Archival document and map/chart scanning and cataloging
- 🔦 **Data Tracking:** Maintaining detailed records and database of records searched.

Project Example

OHI completed an archival research effort to identify former water ranges associated with the Potomac River watershed for the U.S. Navy to support a Preliminary Assessment.
